

MARITIME ACADEMY

SUPERINTENDENT COURSE

Course Objective

After the course you will be able to explain:

- The interrelation between ship owners, class societies, insurers, flag authorities, and last but not least; port state authorities
- The role of class societies
- The practical implications of statutory regulations and
- Important issues from Rules & Regulations to come.
- A practical understanding of the hull strength, stresses, corrosion and fatigue.
- Hull and Machinery surveillance schemes.
- Knowledge of the system of maritime regulations and implementation of legal requirements
- Management of Non-conformities, practical performance

Focus Points

- Class concept and Class Systematics
- Class & Statutory Rules
- Machinery Surveys (survey arrangements, damages)
- Hull strength, damages, inspection
- MARPOL/SOLAS
- ISM/ISPS
- Port State Control

- Ballast Water Management
- Ship Recycling
- Lay-up of vessels
- Inspection of underwater part of a ship in Survey Simulator
- Inspection of double bottom tank in Survey Simulator
- ISM - Dealing with Non-conformities

In order to make the training efficient and practical we use SuSi – Survey Simulator for practical part of the course.

Survey Simulator, is an innovative solution helping to train in carrying out visual inspections in more comprehensive, efficient and safe way. Survey Simulator makes practical training possible without leaving classroom.

Entry requirements It is assumed that participants hold significant competence prior to course, and many issues must be seen as clarifications, refreshing and updates.
